Outward No. PSKCD/ Science/ 2022-2023

Date – 11/12/2022

To,  
M/S Akshay Precision,  
Chandannagar,  
New MIDC,  
Satara-415004.

Subject: To get permission for Industrial visit.

Respected Sir,

We feel indeed privileged to be associated and partnered with your esteemed firm, and very much obliged for being in engagement with you by way organizing and conducting the collaborative activities for the benefit of the students.

In furtherance to our ever long tie-up, cherishing the cause of student's progression, we feel immensely pleased to organize an onsite study visit to your industrial units with a batch of Chemistry students on a date and time convenient to you; that will provide an unique opportunity, enriching experience and exposure for the students to live operations, processes production assembly and industrial/business ecosystem.

We shall be therefore highly obliged if you could give us the convenient date and time on which the proposed onsite study visit can be planned without much disrupting your normal schedule.

Our representative, Asst. Prof.P.D.Kadam Asst. Prof.G.N. Makar and Asst. Prof.N.P.Dhumal, Asst. Prof.P.L.More who is coordinator of the activity, shall be in consultation with you and work out the further details having once the schedule are decided upon.

We look forward to hearing from you and in the meantime, we remain,

Yours Sincerely

**Dr. B. N. Bhosale**  
Principal,  
Prof. Sambhajirao Kadam College,  
Deur, Tal. Koregaon, Dist. Satara.

Subject: Letter Of Appreciation

Respected Sir,

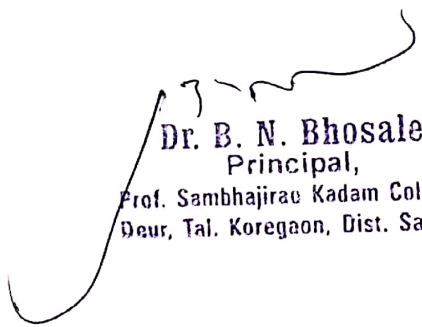

We feel duty-bound to express our sincere gratitude for the continued support and cooperation extended by your esteemed organisation in organising and conducting the Industrial session under experimental/experiential learning at your campus on 11<sup>th</sup> December 2022 besides your ever busy schedule.

Being associated with us as a valued knowledge partner, I must place on record that the interactive session has indeed provided to the faculty and students an opportunity and exposure to the high end engineering application of the theory; which would prove immensely useful in conceptual understanding of theoretical concepts and their practical orientation.

We look forward to your continued support and cooperation in conducting such academic sessions.

Best regards,

Sincerely yours,

  
Dr. B. N. Bhosale  
Principal,  
Prof. Sambhajirao Kadam College,  
Deur, Tal. Koregaon, Dist. Satara.

**Attendance Report on Industrial Session**

(Under the Experimental Learning Programme)

**Students list**

**Activity Date: 11/12/2022**

<b>Sr. No.</b>	<b>Students Name</b>	<b>Class</b>
1	Raut Gayatri Sanjay	BSc.III
2	Pharande Anuja Sanjay	BSc.III
3	Pandu Sana Rajasab	BSc.III
4	Bhosale Prajakta Popat	BSc.III
5	Jadhav Akansha Ankush	BSc.III
6	Garde Sakshi Sandip	BSc.III
7	Tambe Nikhil Aaba	BSc.III
8	Jadhav Sanjana Vijaykumar	BSc.III
9	Dhadame Shraddha Satish	BSc.III
10	Yadav Ashish Sandip	BSc.III

## Report on Industrial Session

(Under the Experimental Learning Programme)

### Name of the Industry:

M/S Akshay Precision Components, MIDC, Satara  
Manufacture of Machine Tools, Plot no. W-71, Additional  
MIDC, Satara-415004

### Email ID

kavadeengineering@gmail.com

### Contact No.

9561957576

### Date of Visit

11/12/2022

### Profile:

10 Students of B.Sc. III  
(Offering Chemistry as Optional Subject)

### Accompanying Faculty:

- 1) Prof. P.D.Kadam.  
Asst. Professor and Head, Department of Chemistry
- 2) Prof. P.L.More  
Asst. Professor, Department of Chemistry
- 3) Prof. G.N.Makar,  
Asst. Professor , Department of Chemistry
- 4) Prof. N. P.Dhumal  
Asst. Professor , Department of Chemistry

### VENUE:

M/S Akshay Precision Components, MIDC, Satara  
Participating Students and the Faculty Members

SSS

## Report on the Industrial Interactive Session at Akshay Precision Components, Satara

(Organised under Experimental Learning Programme)

### Vision:

- Establishing correspondence between theoretical abstract concepts with physical objects.
- Institution strives to provide experimental learning through. (For better conceptual institute shive to provide experimental learning through exposing the student to industry / business interface for better conceptual understanding )

### Objectives:

To impart industrial exposure and hands on training on various industrial process and to introduce machine dynamic, science behind and give them a clear idea about the engineering marvels.

- To harness on industry academiainterface.
- To provide exposure to high end machines and scientific principles, laws, process based on.
- To experience the working environment in industry and visualise the important department in the industry.
- Interaction of students with industry personnets/experts.
- To prepare students for the selection of career path in different department of industry.

### Topic covered: Role of Alloying Elements in an Alloy

Alloying elements are added to steels in order to improve specific properties such as strength, wear, and corrosion resistance. Although theories of alloying have been developed, most commercial alloy steels have been developed by an experimental approach with occasional inspired guesses.

### **Motivation and Facilitation:**

Principal **Dr. B.N. Bhosale** approved the industrial session with the partner industries and encouraged the faculty to organize similar kind of activities for the benefits of students.

The Departments of Physics and Chemistry organised an industrial session. Owner and Managing director **Er. Akshay Kavade** as resource session organized the visit to each engineering departments and explained the process metallurgical aspects.

### **Activities at the work place (Industry):**

- Formal precipitation, introduction and interaction with the industry personals.
- Whirlwind visit to various departments, workshops, production line, machine assembly.
- Expert guidance, machine operations, science and engineering designs involved in it.
- Demonstrating simulation, synchronisation assemblies, alignments, atomization, and acclimatization of process.
- Demonstrating how theoretical laws, principals are depicted through machines, engineering and actual functioning/ actual operational aspects of the machines and production assembly line from raw inputs/ materials to finished and product.
- Question answer session, career opportunities and potential skills required for the industry.

### **Feedback on the Industrial Session: (The Outputs Achieved)**

- The visit provided live exposure to the industrial set-up process high end machines and production line.
- It helped the students to understand the theoretical concepts in the opted courses through experimental learning.
- **Feedback link-** <https://forms.gle/DpmoiyobqZ58Ab4C8>

**The interactive Session helped:**

- to give exposure to the industrial ecosystem safety measures at work place. Environment, sustainability, initiations and practices and Industrial work ethics and professionalism.
- to know the career opportunities offered by the industry and job specific technical and professional skill required to be acquired besides pursuing conventional epics
- to arouse the research acumen in the field.

The Feedback Analysis shows that the students have gained the conceptual understanding on the theoretical topics covered and opined that more such experimental learning programme covering largest spectra of science and technology be organised with the industry partners.

s
